FORMWAY, Technology at work for you

**HANDTMANN
HOTDOG, SAUSAGE, HAM CHEESE,
CULINARY, BAKERY**

handtmann

Ideas for the future.

Handtmann brings cutting edge industry solutions for filling, portioning, linking. Including forming, depositing and handling of different products.

VACUUM FILLING— excellent portioning accuracy with the vane cell feeding system and proven technology **EUR 102,800.00**

AUTOMATIC LINKING— high performance automatic voiding, linking, cutting and hanging attachments **EUR 101,400.00**

FORMING— flexible, multilane high speed production for meat, dairy, snack and convenience products **EUR 99,400.00**

DEPOSITING— accurate and variable multilane filling and depositing **EUR 103,200.00**

CONPRO— continuous sausage production systems for products in vegetable alginate skin **EUR 258,130.00**

LASKA HIGHEST QUALITY PROCESSING

Laska serves the food industry with individual, single-standing machines and production lines.

CUTTERS— for the production of boiled, cooked and raw sausage products **EUR 332,600.00**

GRINDERS— Angle grinders, frozen meat grinders and mixer— grinders with high hourly rate **EUR 202,100.00**

MIXING MACHINES— Optimum mixing actions in food processing **EUR 204,200.00**

EMULSIFIERS— for continuous and efficient production of boiled and cooked sausage **EUR 92,500.00**

FROZEN MEAT CUTTERS— cutting in the optimal size for efficient processing **EUR 72,500.00**

PRODUCTION LINES— Individual conception and execution of fully automated processing lines

TREIF DICING AND SLICING TECHNOLOGY

Treif researches for the best slicing, dicing and cutting solution with its wide range of machines, for different applications and different capacity scales.

MANUAL MACHINES— or SHOP machines are innovative solutions for small and medium enterprises

AUTOMATED MACHINES— or INDUSTRIAL machines provide precision and reliability with high performance, everyday

TAILOR-MADE SOLUTIONS— these are special solutions for specific applications which are custom-made line equipment

BLADE MANUFACTURING— to complete the package from the cutting specialist

LOMA INSPECTION SYSTEMS

LOMA produces a wide range of inspection systems to meet the demands of product safety standards in different food and non-food applications.

METAL DETECTORS— metal detector search heads, conveyor systems, pipeline metal detector for pumped products, vertical fall and pharmaceutical systems.

X-RAY— Package inspection systems for packed and unpacked products, space-savers as entry level inspection for packed products, pipeline for pumped products and crate and box systems which can handle large products.

CHECKWEIGHING - enhanced weight accuracy from light to mid-range to heavy weight systems. Also Available in combination with metal detection systems.

flexible solutions for your business needs
